2023 PQA Sponsorship Prospectus

PQA, the Pharmacy Quality Alliance, is a national quality organization dedicated to improving medication safety, adherence and appropriate use. A measure developer, researcher, educator and convener, PQA’s quality initiatives support better medication use and high-quality care.

A non-profit, non-governmental organization, PQA represents the spectrum of health care leaders involved in prescription drug coverage, medication use, medication services and quality improvement. Our 250 member organizations include: pharmacies, health plans, health care providers, pharmacy benefit managers, biopharmaceutical companies, technology vendors, government agencies, associations, health information technology organizations, researchers, accrediting organizations, and academia. PQA’s work is patient-centered and includes participation from individuals with relevant lived experience.

PQA’s membership represents:
- More than 218 million patients covered by member health plans, pharmacy benefit managers, and healthcare payers
- Over 38,000 community pharmacies and more than 15 pharmacy chains throughout North America
- Forty-two percent of worldwide pharmaceutical sales from life sciences organizations including 8 of the top 10 global pharmaceutical manufacturers
- More than 50 innovative health technology developers and vendors delivering today’s and cultivating tomorrow’s healthcare solutions
- Over 6,500 student pharmacists and 2,000 faculty members at more than 50 academic institutions
- Countless pharmacists, physicians, healthcare providers, thought leaders, experts, decision makers, and quality stakeholders

PQA was established in 2006 as a public-private partnership with the Centers for Medicare and Medicaid Services (CMS) shortly after the implementation of the Medicare Part D Prescription Drug Benefit. PQA was created because there were no organizations or national programs focused on quality improvement for prescription drug programs. PQA develops medication- focused performance measures through a consensus-based, multi-stakeholder process.

Five PQA measures are included in the Medicare Part D Star Ratings program. Fifteen PQA measures are used across CMS’ quality programs and more are used in state and regional quality programs.

PQA fosters diverse relationships across healthcare to advance shared goals. From small-group, invitation-only focus groups to large, public workshops and briefings, your organization can elevate its profile and help lead national discussions on key issues through PQA-convened events.

PQA Convenes
PQA Convenes is a national, multi-stakeholder workshop series for assembling diverse thought leaders and decision makers in medication use quality to build consensus and develop plans of action to address major and timely opportunities for improving patient care and outcomes.

PQA Convenes is designed to:
- Explore how medication use quality and pharmacist-provided care can improve care delivery, patient and provider experiences, and patient outcomes
- Clarify unmet market needs or gaps in information that can be addressed through research, education and collaboration
- Provide recommendations for actionable next steps, which can include:
  - Public reports, white papers or consensus statements
  - Follow up or expanded convenings
  - Communications and engagement strategies to build broader consensus or awareness

PQA’s multi-stakeholder, consensus-based approach is designed to produce results that have broad support and lead to action. A nimble platform, PQA Convenes can take place in online or in-person formats, in small or large groups, and in public or private settings. The format can be adjusted to meet the needs of PQA, its partners and the status of conversations or collaborations on any relevant topic.
